## WORK EXPERIENCE

### Sr Mobile Developer

**EMONEY ADVISOR**                                    Jan 2020 - current

I joined a year old mobile project written using React Native as a developer which was released to iOS and Android app stores about 6 months later.  Shortly after I was appointed mobile tech lead. I went from being a heavy contributor of code to providing technical insight on the mobile side around features in the early stages of design, exploration, and refinement.  I manage a team of 3 mid to senior level mobile developers and work closely with them in designing and developing everything from testing strategies and CI/CD workflows to the actual features themselves.

### Fullstack Software Developer

**KARLANI CAPTIAL**                                   July 2014 - Jan 2020

I was part of a three person engineering team lead by the CTO of Karlani Capital.  Karlani is a VC firm who takes a very hands on approach to their investments such that they integrate their own employees into their investment companies to help mature their products where ever necessary.  I spent the majority of this time upgrading and building out a web and mobile advertising platform, BlueTrackMedia LLC, where we handled everything from migrating database from hosted self-managed machines to AWS RDS databases to rewriting the entire admin portal from PHP-backed HTML to a React app UI and Java RESTful APIs that all ran in Docker on AWS. Towards the end of my time with Karlani I helped get a new parenting mobile app architected and off the ground using React Native, GraphQL, and AWS DynamoDB.

### Web Developer

**SEVONE**                                            Jan 2014 - July 2014

SevOne was a physical network device that could be installed on a network to observe and audit that network.  I was on a team that was responsible for developing the UI for that networking appliance which was built up of some typical forms, buttons and switches as well as some complex data reporting and visualizations.

### Web Developer

**IBM**                                               Jan 2013 - Jan 2014

I spent a year with IBM after graduating from Drexel working on the Onboarding user experience of an enterprise HR suite initiative.  I excelled in this role and quickly became a leader and mentor in HTML, CSS, and JavaScript both within and without my immediate team.

## EDUCATION

### B.S. Computing and Security Technologies

**DREXEL UNIVERSITY - PHILADELPHIA, PA**              2010 - Dec 2012

### A.A.S Game Design and Development

**CAMDEN COUNTY COLLEGE - BLACKWOOD, NJ**             2008 - 2010
